EDUCATION

Talentvar Bootcamp - 2020

+ Back End Web Development (Mongodb, NodeJS)
2 months backend development program. Learn by directly working on the main project.

Re:Coded Bootcamp ([Re:Coded](#) + [Flatiron School](#)) - 2020

+ Front End Web Development (HTML, CSS, JavaScript, React)
5 month intense web development program run by Re:Coded with Flatiron School's curriculum.

Üsküdar University - Istanbul, Turkey (2017 - 2021)

+ Bachelor's Degree: Software Engineering.

EMPLOYMENT HISTORY

E-Bursum, Istanbul, Turkey

Junior Developer, 8/2020 - present

+ Re-built the front-end side of the company's website using HTML & Java Script without frameworks.
+ The pages I built have been integrated, sent to production, and are fully working now.
+ Received positive reactions from the clients.
+ Currently working on a huge website for the company with a lot of options using React, and Axios. Expected to go live this year.

Re:Coded Labs, Istanbul, Turkey

Junior Developer Intern, 12/2019 - 5/2020

+ Worked with teams, and in pairs to build the front-end side of various projects.
+ Contributed to the teams with my knowledge of Algorithms and general programming.

Üsküdar University, Istanbul, Turkey

Teaching Assistant, 2/2020 – 4/2020

+ Work with 1st and 2nd year students to help them understand algorithms and basic programming using Java, and C++.
+ Courses: Software Constructions, Introduction to Java, OOP II.

TECHNICAL PROJECTS

E-Bursum website - [Link](#)

The website of a Turkish company that provides scholarships and internships opportunities for students.

+ Worked on the students' profile and evaluation pages.
+ Used HTML, PHP for frontend, SASS, and JavaScript without framework.
+ Built tables, pagination, and stories components using html and css only.

My Space - [Github](#) | [Demo](#)

This website is my own space to present my personal information!

+ Designed 4 different pages to present my info: About, CV, Projects, Contact.
+ Utilized React framework to create the project.
+ Implemented mdbootstrap library for the design.
+ Used Formspree to link the contact page with my email.

[Page of Youth](#) - [Github](#) | [Demo](#)

A planner website where you can save your schedule for each day and enter a diary/note.

- + Worked with React framework to design the front-end side.
- + Used Firebase for authentication and as a database.
- + Installed React big calendar for the homepage.

[NA'AMAL](#) - [Demo](#)

Website for an organization that provides remote work opportunities for refugees, by linking them to interested companies.

- + Used React framework for building front end side of pages that describe goals, and operations related to Na'amal, and how to contact them.
- + Fetched articles from Na'aml's WordPress API to build a blog for them.
- + Implemented Bootstrap library for the designs.
- + Practiced Jest for building tests of the code.

[Bookmark backend](#)

CRUD the user profiles of an interactive website to bookmark important YouTube videos and resources and share the knowledge with other users. (2 months group project)

- + Practiced mongodb to save the data of the users in a database.
- + Implemented NestJS to create/get/delete/update user profiles.
- + Created CRUD for Education section where the user can add their educational background.

TECHNICAL SKILLS

[HTML](#), [CSS](#), [JS](#), [React framework](#), [Axios](#):

- + Good knowledge, have done different projects, able to create websites from scratch, or use libraries and open source.

[Java](#):

- + Years of study, confident enough, very good knowledge of OOP in Java, able to create large scale systems.

[Sass](#):

- +Moderate knowledge, used in internship.

[NodeJs](#), [Sequelize](#), [SQL](#), [NestJS](#) and [mongodb](#):

- + Beginner.
